

Holm oak

It is a truly majestic tree! Its acorns are sweeter than those of oaks and are very popular with deer, fallow deer and wild boar. In the past, these fruits were used to produce an excellent flour for bread and cakes.

Juniper

Juniper was considered by Greeks and Romans as a magical shrub, which protected from disease and in the Middle Ages, people used sprigs of Juniper to build small talismans, to hang them outside the doors of their houses. Take a small twig and make your own good luck talisman.

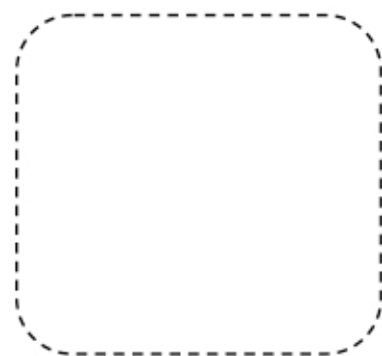

Hawthorn

If you are lucky and you are here in April and May you will see its small pink and white flowers and smell the pleasant and soft scent they produce.

Did you know that Draco Malfoy's magic wand was made by Hawthorn?

Cypress

The Cypress is the symbol of Tuscan countryside, look around, you will find many of these trees! It grows very tall in a cone shape and has leaves like scales. Its bark is very fragrant and its fruits are also cone-shaped pines that remain on the plant even for years!

WELL DONE!!!

You completed your notebook
and you won
the botanist's cockade!

THE PATH OF THE ENCHANTED LEAF

(Il sentiero della foglia incantata)

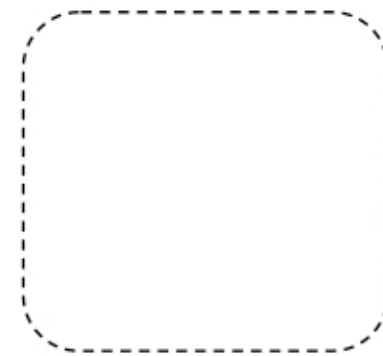

by **Incantina The Little Hare**

Maritime Pine

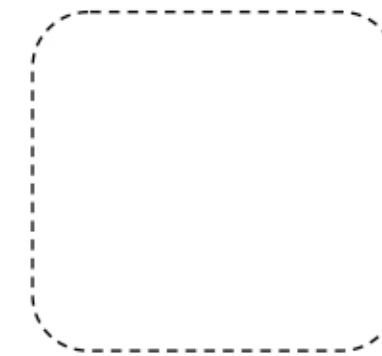

On our beautiful Earth there are many types of pines. These trees have needles grouped in bunches instead of leaves. The pines trees are similar to each other, but each variety differs from the other in the number of needles in each bunch. How many needles has the Maritime Pine? Count them!

Oak tree

The Oak is a tree that reaches large dimensions and can live up to 500 years! Its wood is very valuable and its green leaves in autumn turn to yellow, red and orange.

To get started, you will need a small notebook. Here you will find the instructions to build it.

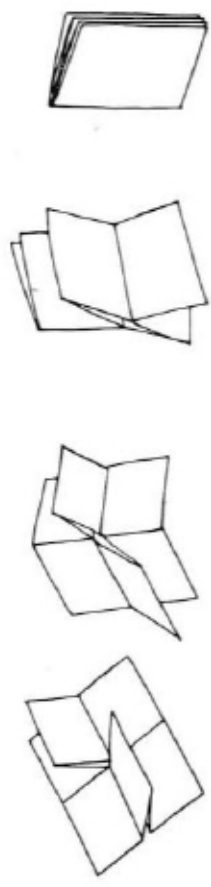

Turn this sheet over and place it on a table, you will notice that there are some lines. You have to fold this sheet along those lines.

Once you've made the folds, pull up and join the middle part, then cut along the dotted li line.

Now play a magic game to fold your new notebook!

In the kingdom of Incantina the little hare, every flower, tree, or blade of grass has a special power!

This is why it is very important to know how to recognize plants.

Are you able to do it?

Thanks to this adventure you will become very expert and you will be able to appreciate the nature that surrounds you.

Ready, steady, go!

First, build your notebook following the instructions you find behind.

It will be of great help to you in your journey!

Follow The Path of the Enchanted Leaf with the help of the map that you will find behind this sheet.

Find the trees, read the description and, as soon as you have learned to recognize each tree, put a stamp on the right page of your notebook; finally, if you want, hug the tree, it will like it!

The more stamps you collect, the more your experience will increase!

Color the map with your imagination!
